

Microdermabrasion & Cranberry Enzyme Treatment

Microdermabrasion is a non-invasive procedure that offers safe and controlled removal of the outer dead layers of the skin. It helps to improve the appearance of fine lines, sunspots, large pores and acne scars. After this professional exfoliation treatment your skin will be smooth, clean and luminous!

Infusion Peel by Osmosis

This is one of the most effective peels on the market as its focus is on remodeling the dermis. Unlike superficial peels, this peel goes much deeper offering more permanent results. The Infusion peel works well for fine lines, sunspots, acne, acne scars and wrinkles. It is safe for sensitive skin and clients with Rosacea!
